EXPERIENCE

Technical Account Manager

Jan 2025 - Mar 2026

Deputy, Melbourne, Australia

- Managed post-sales technical advisory across a \$1.5M+ ARR portfolio of ANZ enterprise and mid-market clients, resolving difficult user-related problems and driving product adoption
- Led 20+ small-to-medium-scale implementation projects by facilitating user-facing discovery meetings, designing product-centric solutions and coordinating delivery with internal and external teams
- Eliminated process friction causing a client 4+ hours of additional daily manual work by identifying the root cause and designing a scalable solution, which led to a client referral
- Proactively audited operational inefficiencies across an enterprise client's workforce management setup, identifying solutions to process friction that converted into \$6K in new revenue
- Built API-based JavaScript scripts to bulk modify platform configurations across complex implementation projects, reducing 6 hours of manual changes to approximately 10 minutes
- Created process diagrams using Confluence whiteboards to explain technical workflows to non-technical stakeholders and highlight business impact across multiple levels of the organisation
- Leveraged Jira and Asana to organise concurrent projects, proactively resolve blockers and keep internal engineering and external delivery teams aligned on delivery timelines
- Built basic SQL queries and modified more complex queries to run bulk platform data checks, helping identify pay discrepancies and support resolution of \$100K+ in pay compliance issues
- Interfaced with technical teams to debug broken workflows, applying strong technical troubleshooting skills to identify root causes and support resolution within SLA

Customer Success Coordinator

Feb 2024 - Dec 2024

Lexer, Melbourne, Australia

- Managed post-sales consultative services across a \$500K+ ARR portfolio of ANZ retail clients, providing data-driven insights to improve marketing operations and highlight product ROI
- Conducted 10+ product training sessions and business reviews with clients in person and via Google Meet, capturing product feedback for internal teams to support feature development and continuous improvement
- Designed data flow and integration mapping in Miro to explain technical integration requirements and customer data flows to multi-level non-technical stakeholders
- Developed a Python script that pulled billable project hours from the Harvest API, reducing weekly manual reconciliation from 6 hours to 5 minutes across client projects
- Facilitated consultative workshops for a customer integration request by reviewing external API documentation, gathering requirements and leading data mapping discussions, converting the opportunity into a \$15K project

EDUCATION

Monash University, Bachelor of Media Communication

Feb 2022 - Dec 2023
